

SEGULA Technologies among top 50 companies to work for in Spain, seeks to hire over 600 professionals

- *SEGULA Technologies, which is present in 30 countries with more than 140 locations throughout the world, employs more than 12,000 professionals, of whom 10% are in Spain*
- *The Group, which currently has 150 vacant posts, plans to hire a total of 600 professionals in Spain in 2019 and 4,700 employees around the world*
- *Industrial, aerospace and telecommunications engineers are the profiles most sought after by the company*

Madrid, 8 April 2019.- SEGULA Technologies, an international engineering and consulting group, has been selected as **one of the top 50 companies to work for**, according to a ranking published by Forbes España magazine. The ranking focused on companies with 1,000 employees or more and a presence in Spain, and was based on the opinion of over 8,000 employees of large companies operating in various sectors in the country.

SEGULA Technologies is an international group specialising in engineering and consulting. An emphasis on innovation and development guides its activity in a variety of sectors, including the automotive, aerospace, energy, rail, naval, pharmaceutical and petrochemical sectors. Operating in Spain since 2002, the company currently has more than 1,150 employees in 12 Spanish cities, including Madrid, Barcelona, Valladolid, Vitoria, Zaragoza and Bilbao.

“SEGULA Technologies is proud to have been included in this ranking, which is a recognition of our employees’ excellent work”, says Carlos Pilarte, CEO of SEGULA Technologies in Spain. “Our aim is not only to seek the best results for our clients across all sectors, but also to concern ourselves with the welfare and happiness of our employees, who are without a doubt the most valuable link in the entire value chain”.

Most sought-after profiles

The Group has major plans to continue its international growth in the 30 countries where it already has a presence. In 2018, it hired more than 4,600 people worldwide in the automotive, aerospace, energy, rail, naval and petrochemical sectors. The countries that most benefited from this expansion were France, which accounted for 50% of new hires, followed by Spain, Brazil, China, Italy, Sweden, the United Kingdom, the United States and Germany.

The company is currently hiring for **more than 150 vacant posts in Spain** and plans to bring on a total of 600 professionals this year. The most desirable candidates will have engineering backgrounds in the following areas: industrial, mechanical, electrical, electronic, telecommunications, aeronautical/aerospace, civil, physical, computer, process, product and quality, etc. The company is deeply committed to attracting talent, offering employees such benefits as national and international mobility plans and flexible remuneration.

A period of growth and expansion

SEGULA Technologies went from being a medium-sized French company in 2012 to becoming an international engineering and consulting group, with nearly 300 industrial clients around the world. In the last five years the Group has doubled in size, increasing from 6,400 employees to 12,000 today. It plans to hire 4,700 professionals worldwide in 2019.

“Innovation occupies an essential place in the strategies of our Group, given that we are especially focused on Industry 4.0, autonomous and connected mobility, the environment, advanced tools and methods and data engineering. These innovative areas are very attractive to the professional profiles that join the SEGULA Technologies team every year”, says Carlos Pilarte.

About SEGULA Technologies

SEGULA Technologies is an engineering and consulting group with a global presence, helping to boost competitiveness within all of the major industrial sectors: automotive, aerospace, energy, rail, naval, pharmaceutical and petrochemical. Operating in 28 countries and with 140 offices worldwide, the Group fosters a close relationship with its customers thanks to the expertise of its 12,000 employees. As a leading engineering specialist placing innovation at the heart of its strategy, SEGULA Technologies executes large-scale projects, ranging from technical studies to industrialisation and production.
