

Environmental Policy

SEGULA Technologies

SEGULA Technologies' Top Management is committed to the respect and improvement of the environment. This Policy is defined as the framework to carry out our activities and services.

These are the objectives that we commit ourselves to:

- Integrate environmental aspects adequate to our activities in all areas of our management, endeavoring to promote a continuous improvement of our environmental behavior through the establishment of objectives.
- Watch over to guarantee compliance with all legal standards for environmental protection and other requirements to which SEGULA subscribes voluntarily
- Promote the efficient use of natural resources, developing habits of rational use among our collaborators, and promoting whenever possible the use of technologies respectful with the environment:
 - We promote energy efficiency
 - We minimize waste generation
 - We prioritize at all times prevention of pollution over its correction.
 - We prioritize reusing and recycling the material that we generate in our activity.
- Support initiatives to prevent, mitigate and adapt to the climate change,
- Provide our employees with the necessary training to respect the environment in the development of their daily work.
- Contribute to the continuous improvement of the effectiveness of the Environmental Management System and its processes.

To achieve these objectives, we have developed an environmental management system, that applies to product design and process engineering in automotive, industry, aeronautics, railway, defense and energy. Project management and construction supervision in all industrial sectors.

We make this Policy available to all our collaborators, clients and suppliers in order to achieve, among all of us, a better protection and respect for the environment.

Albert Nacinovic
General Manager, may 2025
